

Kings of Code is a one day conference aimed at full time and freelance backend developers from startups, interactive agencies and IT companies. It offers an in-depth overview of the latest technologies used in building and scaling online and mobile services.

## Learn about Node.js, scaling, NOSQL, API's, Varnish, Redis, HTML 5 and much more.

### **Great speakers from across the globe –**

Let your employee be inspired by some of the most talented and renowned names in the industry

**Just one day** – There is a lot to do at work, we understand. Kings of Code gets you up to speed in one day. You'll return to work more motivated than ever

**Low cost** – Kings of Code is cheap and includes high quality content, lunch, drinks, beers and networking with peers.

**Keynotes and Workshops** – A balanced program that covers the latest trends in development via high class keynotes and in-depth workshops.

### **Learn from and network with peers –**

Talk with peers, share best practices and tricks while having fun with a beer in your hand.

**Free wifi** – Are there urgent matters? Fix stuff on the spot with free wifi.

**Crash course in one day** – This is one day to master all important topics. Grow as a developer.

**Hack Battle for true coders** – The weekend preceding the conference there is the ultimate show off for coders, the Hack Battle. Have fun, learn the latest stuff on API's and compete with other developers.
